Innovation & Technology for Quality of Life

As the committee of the Thai Biomedical Engineering Research Association has decided to upgrade the "Thai Biomedical Engineering Conference (ThaiBME)" originally held annually with presentations in Thai Language to the "Biomedical Engineering International Conference (BMEiCON)", the 2nd BMEiCON 2009 is still intended to provide an international forum where researchers, practitioners, and professionals interested in the advances in, and applications of, biomedical engineering can exchange the latest research, results, and ideas in these areas through presentation and discussion. Building on the success of the last two symposiums in ThaiBME 2007 and the 1st BMEiCON 2008, BMEiCON is shaping up to become an important annual international conference series held in Thailand that will foster the growth of biomedical engineering education and research collaborations.

The 2nd BMEiCON 2009 will be held in Phuket, Thailand, during August 13-14, 2009. The organizing committee is pleased to invite all engineers, physicians, scientists, technicians, and technologists to attend and help shape the future of biomedical technology.
